

How To set up Jupiter Mobile App

Jupiter is designed for smartphones and tablets, but the app **IS NOT** available in *the app stores*. Use the following instructions to get the app directly from Jupiter's website and add to your Home Screen on your mobile device.

iPhone and iPad Instructions

Step 1:

Jupiter App IS NOT available in the App Store, you have to go directly to the website.

Use **Safari** to go to login.jupitered.com

Step 2:

Click the Share button  and select "Add to Home Screen". That saves the Jupiter app to your home screen. (The app definitely works better than mobile Safari, due to Apple bugs and quirky scrolling beyond our control.)

Directions to find the share button: To add a webpage to your iPhone home screen, navigate to the webpage in Safari, tap the share icon (square with an arrow), scroll down, and select "Add to Home Screen". You can then customize the name and appearance before adding it to your home screen.

Android Instructions

Step 1:

Jupiter App IS NOT available in the Play Store, you have to go directly to the website.

Use **Chrome** to go to login.jupitered.com.

Step 2:

Click the  button and select "Add to Home screen". That saves the Jupiter app to your home screen. (The app definitely works better than mobile Chrome, due to Google bugs beyond our control.)

Touchscreen Computers Instructions

Use your browser. Go to [Setup > My Account](#) and check "Use tablet layout". That expands the spacing so it is easier to use your finger. It also moves the class menu to the top of the screen.
